## Managing and Leading Change in Copenhagen Public Libraries

KØBENHAVNS KOMMUNE Kultur- og Fritidsforvaltningen Bibliotekerne

#### Introduction

# Jens Ingemann Library director City of Copenhagen, since 2004 Adjunct professor, Royal Danish Library School

- Copenhagen capital of Denmark (Scandinavia)
- 500.000+ inhabitants
- Greater Copenhagen Area 2.500.000/3.000.000 inhabitants (Denmark / Sweden).

#### Managing and Leading Change

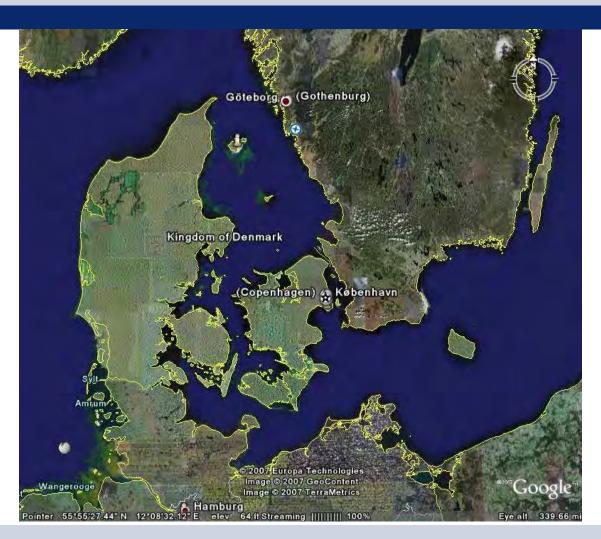

Introduction – Public libraries in Copenhagen and in Denmark

Managing and leading change:

- New strategic plan and new library structure
- Copenhagen Digital Library
- Organizational change efficiency and economies of scale
- Actual development projects
- Staff development

#### Denmark

#### Copenhagen Public Libraries

- 2006 aprox. 3.9 mill. visitors, aprox. 8. mill. loans
- Central library, 19 branch libraries
- www.bibliotek.kk.dk 2.9. mio. visitors a year

#### Copenhagen Public Libraries

- Self check out and return in all branches and central library – 90-92%
- Sorting robot in central library
- WIFI in all libraries
- Sms/e-mail notification 3 days before loan period expires
- Fines can be payed with credit card on homepage

#### Public Libraries in Denmark

- Danish population 5.4 mio
- 98 local library authorities
- per capita library spending 63 euro, library loans
   13,58 / year
- Around 5000 f.t.e. in Danish public libraries
- 64% of adult population are public library users half of them on monthly basis
- First Danish library act in 1920

#### 2000: New Library Vision

- Vision the hybrid library: The library is present both in a virtual and a physical context
- Development of virtual services
- Close interaction between virtual library services and services in physical library building
- Integrate access to information in people's everyday lives
- The physical library space for meeting, learning and culture

#### 2000: New Library Act

- Continued free access to all basic services
- Enhanced cooperation between research and public libraries
- www.bibliotek.dk Public Internet access to national bibliography and AND holdings in all public and research libraries, combined with option to order and pick up a title at any library

#### Actual focus areas in Cph.

- Supply of books and other items more new and relevant items of good quality – both physical and digital – efficient and fast selection- and acquisition process
- Improve service level less administrative staff,
   more focus on customer service and development
   new organisation
- Enhanced development of both physical libraries and library website – bibliotek.kk.dk
- User surveys adults, children, web services

#### Acquisitions – changes in 2006

- Rethinking of work flow means all new items are on shelves 7 weeks earlier than before
- Selection process centralized selections made for best possible citywide collection, not individual branch collection
- Standard Ioan period reduced from 5 to 4 weeks to increase circulation
- More money spent on new items
- Result: More new items, more check-outs and reduced waiting lists for new books, CD's etc.

#### Library Treaths and Opportunities

- Decrease in number of visitors in physical libraries
   facilities in bad shape, too few opening hours,
   competition, other ways of using library services
- Books are bought and read as never before and citizens use digital services for the physical library on a citywide (and national) level
- Almost everbody use the Internet and can do more by themselves (Google, Wikipedia etc.)
- Still physical library facilities are essential

#### New Strategic Plan – Library Policy

- How to cope with changes and opportunities both externally and internally?
- Process involving staff on a broad scale
- Stakeholders were invited to comment on draft version before final political decision
- New library policy approved by City Council in March
- Library strategy must now be implemented

#### Library Strategy

- Libraries are essential for local communities, democracy, knowledge, culture and learning
- Backbone:
- Danish library act Libraries should
- Offer access to information, knowledge, lifelong learning
- 2. Promote reading and cultural activities

#### Library Strategy

- Always user perspective not collections or buildings
- Census information and user surveys used in a proactive way
- Physical libraries should be represented in all parts of the city and offer citywide and integrated services
- Service level should be increased further focus on efficiency, collaboration and development activities

#### Library Strategy

#### Focus on:

- Literature books are still core business
- Development of digital services user involvement
- Refurbishing of existing physical libraries, new library structure (new development areas, change in population and user needs in various parts of city)
- Four priority target groups: kids, young people, students (of all kinds and ages), ethnic minorities
- National and international cooperation

#### New Library Structure – why?

- Questions: Is present library structure best possible – both regarding location in individual neighbourhoods and on a citywide basis
- Is it possible to increase and enhance citywide library service within existing operation budget
- How to use user surveys in a proactive way
- How to create a new agenda by presenting future oriented and ambitious proposal for political level

#### Libraries in a city – Ideals

- Libraries must be present in all neighbourhoods, at a central location, close to high-level public transport, with easy access (bikes, pedestrians) and combined with "cultural houses" where possible
- Building must be modern and flexible, represent good architecture, meet defined space needs – signaling quality, competence, accomodation
- Physical collection smaller but more up-to-date combined with new central store - more readingand study facilities, more tables, chairs and better presentation of collection.

#### **Ideal Definition**

- Long opening hours, Central 67(50), Large branch I 60/65(40-45), smaller branch 40.
- Large branch as central extra pick-up of resservations facility - + 31h/week
- Integration physical/digital library services
- Professional and competent staff
- Fact: Citizens use good, modern libraries: Investing in expanding, renovating branches and new and smart interior, signage and more new book and other items pays well off!

#### Library structure – 4 scenarios

- Study shows funding needed for renovation of run down facilities sum up to 25 mill. Euro, half of this sum to be spent at Central Library
- 4 scenarios have been presented for political board
- All scenarios include Central library and a large local library in each (administrative) neighbourhood – 10 branches.
- 11 libraries forming new basic structure

#### Scenario 1

- All scenarios include renovation/expanding and building of new facilities. Total investment 35 to 40 mill. Euro – and unchanged operational budget.
  - 1. New basic structure. Allows 50% increase in budget for supply of new books and other items and expanding opening hours to ideal model.

#### Oversigt over omegnsbiblioteker:

Nr.	Bibliotekstype	Kommune
1	Hovedbibliotek	Gentofte
2	Filial Dyssegaard	Gentofte
3	Filial Høje-Gladsaxe	Gladsaxe
4	Filial Mørkhøj	Gladsaxe
5	Filial Islev	Rødvore
6	Hovedbibliotek	Rødvore
7	Filial Friheden	Hvidovre
8	Hovedbibliotek	Hvidovre
9	Filial Løjtegård	Tårnby
10	Hovedbibliotek	Tårnby

For overskuelighedens skyld er de 4 biblioteker på Frederiksberg ikke medtaget.

#### Scenarios 2-3

- 2. Basic structure in combination with 7 combined school/public libraries, allows 30 % increase in acquisition budget and more opening hours but not quite to ideal model,
- 3. Basic structure in combination with 5 smaller branches allows 18 % increase in acquisition budget and more opening hours but not at all to ideal model.

•

#### Scenario 4

- 4. Basic structure and 8 branches allows no increase in budget for supply of new books and other items and no increase in opening hours.
- Scenarios 1-3 are recommended by library administration, 4 is not, - small decline in operating budget will mean dramatic cut-back in service level (opening hours, acquisition budget).

#### Political decicion

- If operating budget should be refocused to more acquisitions and longer opening hours or should system remain very decentralized. Implementation possible on short term
- If investment capital is available for renovating efforts and building projects in neighbourhoods.
   Implementation will take 3-4 years
- If a new main library should be built or the present main library should be renovated!
   Implementation will take 3-4 years

#### Efficiency and economies of scale

- New organisational structure
- Smaller management team
- Administrative processes are centralized –
- Staff in libraries should focus on user service and development of activities
- Transportation and handling, value-chains

#### Organizational Changes

- Reorganized branch structure North and South areas.
- Branch managers are responsible for up to 3 physical locations
- Main library reorganization discussed
- Development coordinator
- Teams (Team Kids, team Youth, team Ethnic Minorities, Team Education etc.)
- Copenhagen Digital Library

#### Copenhagen Digital Library

- www.bibliotek.kk.dk
- Small team of about 10 people focus on digital content
- people from the libraries are participating on an ad-hoc project basis
- Focus on digital development, web 2.0 and on integration of digital library in physical libraries (and v.v.)

#### Bibliotek.kk.dk

#### Development coordinator

- Focus on innovation and development
- Not another development office patron focused development can only succeed if staff is in close contact with patrons
- Participation in Danish "Innovation Cup"
- Some examples of recent developments, many partly funded by state development grants – from the Danish Library Authority – <u>www.bs.dk</u>

#### **Innovation Cup**

#### "Bookbites"

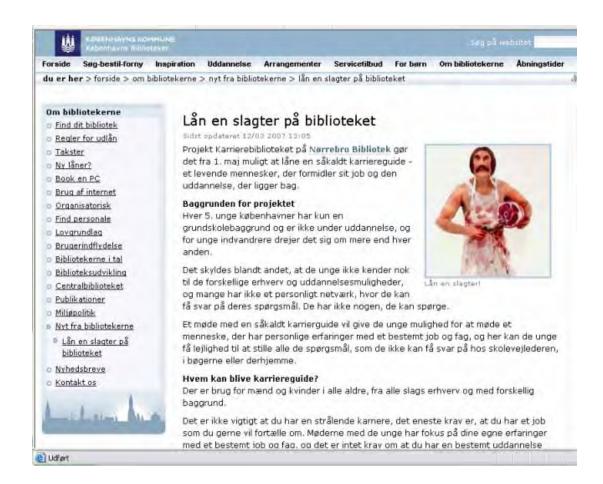

#### "Check out a librarian"

#### "Check out a butcher"

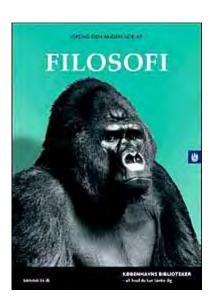

### **Innovative Branding?**

#### "Everything you can imagine/think of"

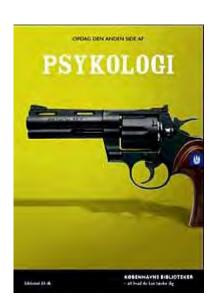

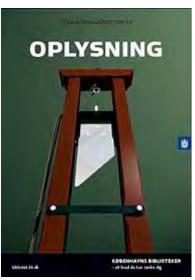

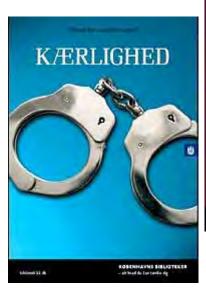

## Innovative Branding???...

#### Staff development

- Manager development activities
- Increase in internal learning activities 23 things
- New positions are staffed with focus on individual skills, not only formal background (clerks/librarians)
- More professional diversity when recruiting new staff
- More staff members from minority groups staff composition should reflect neighbourhoods

## Thank you!!
