

Recommendations from Working Group 2 made at the IME ICC2 August 18th 2004

Working Group 2 – Corporate Names

The working group focused its attention in identifying aspects to be changed and/or incorporated to the following document:

STATEMENT OF INTERNATIONAL CATALOGUING PRINCIPLES (Draft),
Frankfurt, Germany, 2003

1. Scope: consider that
 - 1.1 We are working on principles and not on the ICC
 - 1.2 These principles should replace the Paris Principles
 - 1.3 Therefore, these principles must contain definitions of the terms for descriptive cataloguing as well as for subject cataloguing.
2. Incorporate in the body of the principles the definition of Corporate body, basing it on FRBR 3.2.6: Corporate body is “an organization or group of individuals and/or organizations acting as a unit”

The entity defined as corporate body comprises organizations and groups of persons and/or organizations identified by a particular name.

- Choice of access points: In the second paragraph of 5.1.1.1. where it says

In the case of corporate bodies as creators, this is limited...

substitute for

In the case of corporate bodies, access is limited...

- Authorized headings: change the first paragraph of 5.1.2 for:
The authorized heading should identify the entity in a consistent manner. The form should be the predominant in manifestations or the most well known name for the users of the catalogue (e.g., conventional name)

Eliminate in the second paragraph: ... , if necessary,...

- In principle 5.4 Forms of Names for Corporate Bodies, introduce a generic concept such as

Enter a corporate body directly under the name by which it is generally identified (see AACR2 rule 24.1 A)
