Linked Data for Libraries - Labs

- Enhancement of linked data creation and editing tools

- Exploration of linked data relationships and analysis of the graph to directly improve discovery

- BIBFRAME ontology development and piloting efforts in URI persistence

- Metadata conversion tool development needed by LD4P and the broader library community
LD4P Program

• Internal project coordination

• Community outreach

• Vendor outreach

• Linked data project coordination
LD4P Expected Outcomes and Benefits

- Development of the ability for libraries to work in an open, networked environment in the construction of their metadata

- Extension of the BIBFRAME ontology

- Open source tool development for use in metadata creation and transformation in a linked open data environment

- Engagement with other strategic linked-data projects

- Engender community engagement
