Focus Area 2

To create awareness about IFLA to new members and engage them in IFLA activities

Focusing on the developing countries of the three regions (Africa, Asia & Oceania, and Latin America & the Caribbean), the project will aim to promote strategic and specific actions to increase the number of national library associations as members of IFLA, as well as participation from professionals in IFLA decision-making positions, especially Standing Committee.

Background:

IFLA Division V Ambassador Project – As a result of the online survey coordinated by Division V “Having our voice heard at IFLA”. Strategies to increase the number of members from our region in IFLA decision-making positions” in the 1st semester of 2019, a major problem identified among professionals in developing countries was the lack of knowledge about IFLA, its structure, procedures and distinct possibilities for participation. And this is due to a number of factors, such as: a view that it is an elitist institution; difficulty in accessing information; inaccessible languages; or even misunderstanding about its structure. Thus, the three regional sections propose to develop a network of representatives (called “ambassadors”) in each developing country, who will have the task of reaching as many professionals as possible and disseminate a large amount of content, data, and information, specially prepared for them.

This project is part of a larger initiative, which is being developed by Division V with the support of various professionals, which aims to analyse and seek solutions to the region's well-known financial constraints. Thus, this larger project focuses on identifying mechanisms and ways of supporting the participation of new members, developing strategies that comprise associations and / or members that have been supported, and ensure that representatives elected for different SCs are able to participate for at least two years. This will require a strong network of contacts and involvement with all other IFLA sections, with the PC, GB and IFLA HQ.

IFLA Strategic Direction

4. Optimise our Organisation

We will reinforce our position as the most representative global library organisation through a membership strategy that promotes diversity, engagement and action. We are recognised as an organisation that listens and responds to its members’ expectations.

Key Initiatives

4.3	Increase, diversify and engage our membership
-----	---

	Currently, only 18% countries from Africa has active association member at IFLA. From Asia & Oceania, only 36% and from Latin America and the Caribbean, only 36%. Therefore, this region represents a huge growth potential for IFLA. On the other hand, the three regions together support less than 30% of the total number of professionals working on IFLA standing committees. This project seeks to increase the participation of developing countries over the next two years by at least 25%. This will certainly reinforce IFLA's position as a global institution that listens and responds to the expectations of its members.
