In our rapidly changing world, continuing professional development (CPD) has become an imperative for library and information professionals. CPD is important for us all, regardless of whether we work in public libraries, academic libraries or special libraries, regardless of the part of the world we live in. Nevertheless, there are often significant challenges which stand in the way of or impact on the effectiveness of the developmental opportunities: time, money, limited access to training activities, or the lack of immediate relevance to practice.

For a successful professional future, it is critical that there is a strong commitment to high quality CPD. The IFLA Section for Continuing Professional Development and Workplace Learning (CPDWL) has recently revised and updated the Guidelines for Continuing Professional Development: Principles and Best Practices. The text of the Guidelines is available at http://www.ifla.org/publications/node/10532.

This workshop will introduce you to the Guidelines and help you to utilise them in the context of professional learning: as an employer, as the officer of a professional association, as a training provider, or as an advocate for CPD quality in the library and information sector. By participating in the workshop, you will:

* Develop your understanding of the IFLA CPD Guidelines
* Consider the application of the Guidelines to your role in the library & information sector
* Determine the strategies that will ensure you adopt best practice approaches to your CPD activities
* Draft a plan of action to help you achieve your organisation’s CPD goals in the coming months.

Don't miss this opportunity to join us: at these collegiate roundtable discussions you have the chance to share your ideas and to shape your own professional future.

If you can, please bring a mobile device with you to make the most of this interactive workshop!

See you there!
