Introduction

Between June 15 and 20 members of Section Libraries for Children and Young Adults participated in a conversation about how a united library field can tackle the challenges of the future. Only 9 answered to the question about years in library field, these 9 represent 197 years of library experience. Altogether 22 of total of 22 participated in some phase of the process, though!

The members of SC represent different library fields: public libraries, national libraries, associations, individual members...

The workshop was conducted via online survey and discussion tools, such as Webropol, surveyMonkey and Google Drive.

A vision for libraries

Libraries enable literate, informed and participative societies. When we look at the future, according to the debates online, this means that [QUOTES FROM THE STATE OF THE LIBRARY GAME].

The core values of libraries (Q4):

1. Easy Access and no fees for children and YA
2. Democracy, freedom of reading, speech, thinking and expression

Comments on future challenges and possibilities:

Challenges and possibilities are different depending on the country. Support from the government and institutions is the key to the future of libraries in many countries.

Off all kinds of inequality and discriminations against librarianship

LIS professionals may need to move beyond accumulation knowledge to actually sharing it. Well-thought-out-community-specific ideals should be identified and actively promoted, one borough or small town at a time. A lot of the challenges we face are due to the inadequate resource distribution, the worst being education.

The librarians and library staff should reflect the diversity of their communities

More focus on making big events, programs etc.
