15:00 Workshops – Generating policy change

3-4 invited speakers/workshop facilitators will lead participants in smaller groups on specific library topics. This would be an opportunity for participants to learn more about why the speaker’s campaign worked, what did and didn’t work, and ask any questions. Attendees will be asked to join groups based on the presentations they have heard from the speakers.

The purpose of the workshops is to get participants thinking about how they might specifically advocate for copyright reform, e-Lending or the post-2015 development framework in their country, and how their input might contribute to the IFLA international strategy.

16:00 Coffee

16.30 Report back
