242 AUTHORIZED ACCESS POINT – NAME / TITLE (EXPRESSION)

Field Definition

This field contains a name/ title access point for an expression of a work. It also serves as a linking field to the authority record describing the related work, by the means of a $3 subfield (standard subfields technique) or an embedded 001 field (embedded fields technique) holding the record identifier for the work.

A name/title access point is intended to bring together the records for issues of an expression that has been published under different titles or items in series.

This field is intended for catalogues that comply with the FRBR model, and is found in a record describing an expression.

Occurrence

Optional. Repeatable for alternative script forms.

Indicators

Indicator 1 blank (not defined)
Indicator 2 Structure Indicator
  # Not applicable (Embedded fields technique) or No information available (Standard subfields technique)
  0 Unstructured title (Standard subfields technique)
  1 Structured title (Standard subfields technique)

A) Subfields: Embedded Fields Technique

Data Subfields

$1 Linking data

Contains the tag and indicator values of the embedded fields, without spacing or punctuation. Repeatable.

Control Subfields

$7 Script of cataloguing and script of the base access point.

See specification of Control Subfields above. Not repeatable.

$8 Language of cataloguing and language of the base access point

See specification of Control Subfields above. Not repeatable.

Notes on field contents

Each element is coded according to the 2- field appropriate to the element: 200 AUTHORIZED ACCESS POINT - PERSONAL NAME, 210 AUTHORIZED ACCESS POINT - CORPORATE BODY NAME, 215 AUTHORIZED ACCESS POINT - TERRITORIAL OR GEOGRAPHICAL NAME, or 220 AUTHORIZED ACCESS POINT - FAMILY NAME for the name; and a 232 AUTHORIZED ACCESS POINT – TITLE (EXPRESSION) for the title. The tag, indicators, and data subfields for the name and title are embedded in a field 240, with each preceded by subfield identifier $1.

When control subfields are needed, they should precede the first $1 subfields containing embedded data.

A more detailed description of embedded fields is contained in the UNIMARC Manual: Bibliographic Format under the 4- field block.
B) Subfields: Standard Subfields Technique

Data Subfields

In the list of subfields below, those pertaining to the related work are marked with the wording “[Work]”. They can be copied from the record describing the related work. The subfields pertaining to the expression are marked with “[Expression]”.

$\text{Sa}$ Name [Work]

The name of the person, corporate body or family with primary intellectual responsibility for the work registered in subfield $t$. When subfield $\text{Sa}$ is a composite of more than one standard subfield use the punctuation prescribed by the cataloguing rules used by the bibliographic agency to separate the elements. Mandatory. Not repeatable.

$\text{St}$ Title [Work]

The title by which the work is known. When the title of the work is unstructured (indicator 2 = # or 0) subfield $\text{St}$ is a composite of more than one standard subfield and the punctuation prescribed by the cataloguing rules used by the bibliographic agency is used to separate the elements. When the title of the work is structured (indicator 2 = 1) subfield $\text{St}$ is the title by which the work is known without any qualifications or mention of any part. This subfield should be present whenever field 241 is used. Mandatory.

$\text{Sh}$ Number of section or part [Work]

The number of a part when the item to which the title is being applied is only a part of the work named in the title. Repeatable for a subdivided part.

$\text{Si}$ Name of section or part [Work]

The name of a part when the item to which the title is being applied is only a part of the work named in the title. Repeatable for a subdivided part.

$\text{Sc}$ Form of work [Work]

Standard phrase indicating class or genre to which a work belongs. Not repeatable.

$\text{Sd}$ Date of work [Work]

The date of the work, when required as part of the title in order to differentiate a work from another work. The date of the work is the earliest date associated with a work. Date of work may be the date the work was created or the date the work was first published or released. Not repeatable.

$\text{Se}$ Place of origin of work [Work]

The place of origin of the work, when required as part of the title in order to differentiate a work from another work. The place of origin of the work is the country or other territorial jurisdiction from which a work originated. Not repeatable. If more than one place need to be recorded, all of them should be entered in a single subfield $\text{Se}$.

$\text{Sf}$ Original language of the work [Work]
The original language of the work, when required as part of the title of the work. Not repeatable. If the work is in more than one language, all languages should be entered in a single subfield $f$.

A term added to a subject access point to further specify the kind(s) or genre(s) of material. Agencies not using this subdivision should use $x$ instead. Repeatable.
$x$  Topical subdivision

A term added to a subject access point to specify further the topic that the access point represents. Repeatable.

$y$  Geographical subdivision

A term added to a subject access point to specify a place in relation to a title which the subject access point represents. Repeatable.

$z$  Chronological subdivision

A term added to a subject access point to specify the period in time in relation to a title which the subject access point represents. Repeatable.

Control Subfields

$3$  Authority record identifier for the related work.

See specification of Control Subfields above. Not repeatable.

$7$  Script of cataloguing and script of the base access point.

See specification of Control Subfields above. Not repeatable.

$8$  Language of cataloguing and language of the base access point

See specification of Control Subfields above. Not repeatable.

442 VARIANT ACCESS POINT – NAME / TITLE (EXPRESSION)

Field Definition

This field contains the variant access point for a form of name/title referred from. The data are carried in appropriate subfields according to the techniques described under field 242.

This field is intended for catalogues that comply with the FRBR model, and is found in a record describing an expression.

Occurrence

Optional. Repeatable.

Indicators

Indicator 1 blank (not defined)
Indicator 2 Structure Indicator
   # Not applicable (Embedded fields technique) or No information available (Standard subfields technique)
   0 Unstructured title (Standard subfields technique)
   1 Structured title (Standard subfields technique)

$5 Tracing control Not repeatable.
$6 Interfield linking data Not repeatable.
$7 Script of cataloguing and script of the base access point Not repeatable.
$8 Language of cataloguing and language of the base access point Not repeatable.

Notes on field contents

Each element is coded according to the 2-- field appropriate to the element: 200 AUTHORIZED ACCESS POINT - PERSONAL NAME, 210 AUTHORIZED ACCESS POINT - CORPORATE BODY NAME, 215 AUTHORIZED ACCESS POINT - TERRITORIAL OR GEOGRAPHICAL NAME, or 220 AUTHORIZED ACCESS POINT - FAMILY NAME for the name; and a 232 AUTHORIZED ACCESS POINT - TITLE (EXPRESSION) for the title. The tag, indicators, and data subfields for the name and title are embedded in a field 442, with each preceded by subfield identifier $1. Subject subdivisions are carried in the embedded title field.

When control subfields are needed, they should precede the first $1 subfields containing embedded data. (Control subfields defined for the 200, 210, 215, 220, 230, 231 or 232 fields are not embedded in a $1 subfield.)

A more detailed description of embedded fields is contained in the UNIMARC Manual - Bibliographic Format under the 4-- field block.
### B) Subfields: Standard Subfields Technique

The complete description of the subfields can be found under field 242.

```

Example of embedded fields technique. Emily Brontë’s Wuthering Heights has numerous translations in French, including the one made by Sylvère Monod, which is known under the title *Hurlemont*. Other translations bear different titles.
542 RELATED ACCESS POINT – NAME / TITLE (EXPRESSION)

Field Definition

This field contains an access point for an authorized form of name/title that is related to the access point in the 2- field. The data are carried in appropriate subfields according to the techniques described under field 242.

This field is intended for catalogues that comply with the FRBR model, and is found in a record describing an expression.

Occurrence

Optional. Repeatable.

The expression (field 242) is the libretto by M.Musorgsky to his opera “Boris Godunov” (revised version of 1872). First 542 contains access point for the expression – translation of the libretto into French (author of translation – Lui Lalua), i.e. relationship is established between expressions of the same work. Second 542 contains access point for the expression – version of the opera arranged by N.Rimsky-Korsakov (relationship is established between expressions of different works). In both cases 542 subfield $3 includes Authority Record Identifier for the expression.
742 AUTHORIZED ACCESS POINT IN ANOTHER LANGUAGE AND/OR SCRIPT – NAME / TITLE (EXPRESSION)

Field Definition
This field contains a name/title authorized access point that is in another language and/or script form of the 242 access point. The data are carried in appropriate subfields according to the techniques described under field 242.

This field is intended for catalogues that comply with the FRBR model, and is found in a record describing an expression.

Occurrence
Optional. Repeatable.
