210 PUBLICATION, DISTRIBUTION, ETC

Field Definition
This field contains information on the publication, distribution and manufacture of the item including associated dates. It is also used in the case of manuscripts for place and date of writing and name of copyist or scriptorium. It corresponds to the ISBD Publication, Distribution, etc. Area.

Occurrence
Optional. Repeatable for recording a sequence of publication data in addition to or instead of field 306, Notes pertaining to publication, distribution, etc.

Indicators
Indicator 1: Sequence of publication data
Specifies whether the publisher, distributor, etc, place and date of publication recorded in the field is first/earliest, intervening or current.

# Not applicable / Earliest available publisher
For monographic works that are complete as first issued value blank is used. For continuing resources, value blank is used when a continuing resource is first catalogued. Information given as value blank is not changed, unless incorrect or earlier issues of a continuing resource are later available with differing publishing information.

0 Intervening publisher
When the publisher changes, or when the place of publication changes, additional publication statements relating to the earliest and intervening may be recorded with first indicator value 0.

1 Current or latest publisher
When the publisher changes, or when the place of publication changes, the current publication statement may be added with first indicator value 1.

Indicator 2: Type of release

# Produced in multiple copies, usually published or publically distributed

1 Not published or publically distributed
Indicates a non-published work, e.g. manuscript (EX 16, 17, 18, 24, 25)

Subfields
$a Place of Publication, Distribution, etc.
The town or other locality where the item is published or distributed or, in the case of a manuscript, written. If the place is not well-known or is incorrectly or archaically spelled, amplification may be added in brackets according to the provisions of ISBD (EX 2, 3). Repeatable for each place named (EX 7, 12, 13) or for the place of publication in another language (EX 14).

$ b Address of Publisher, Distributor, etc.
The full postal address of a publisher, scriptorium or distributor within parentheses or brackets, usually, in the case of publisher, included only when the publisher is not well-known (EX 4). Repeatable.

$c Name of Publisher, Distributor, etc.
The name of the publisher or distributor which may be in a shortened form so long as it is readily recognisable (EX 1). When a statement of function of the distributor is included, it is entered in this subfield in brackets (EX 5, 12). In the case of manuscripts, if known, the name of scriptorium or copyist is mentioned (EX 18). Repeatable (EX 8).

$d Date of Publication, Distribution, etc.
The date or approximate date of publication, the writing of a manuscript, production of an art work, etc., or a copyright date (EX 7) or date of manufacture (EX 11), or the time period that specifies the part of
the bibliographic item to which the field applies (EX 19-23). An open date (EX 6) or spanning date (EX 10) is permitted. Repeatable for a date of distribution when included in addition to a date of publication and separated from it by an intervening subfield (EX 12), otherwise not repeatable.

$e  
Place of Manufacture
The place of manufacture of an item, e.g. the place of printing of a book (EX 9) or the place where a composite manuscript has been collected or bound together. If the place is not well-known or is incorrectly named, amplification may be added in brackets according to the provisions of ISBD. In the case of older monographic publications for which the publication and printing information is recorded in separate elements and not according to the order on the source of information, $e is used to record information taken from the colophon, whether it concerns publication or printing or both. Repeatable.

$g  
Name of Manufacturer
The name of the manufacturer (e.g. printer) (EX 3, 9) or the person or institution collecting different units to produce a composite manuscript. May be in a shortened form so long as it is readily recognisable. In the case of older monographic publications for which the publication and printing information is recorded in separate elements and not according to the order on the source of information, $g is used to record information taken from the colophon, whether it concerns the publisher or the printer or both. Repeatable.

$h  
Date of Manufacture
The date of manufacture of an item or assembling of a manuscript, when used to supplement the date of publication (EX 13). In the case of older monographic publications for which the publication and printing information is recorded in separate elements and not according to the order on the source of information, $h is used to record information taken from the colophon, whether it concerns the publication or the printing or both. Repeatable.

$s  
Printing and/or publishing information transcribed as found in the colophon
Used for older monographic publications (antiquarian). The place and/or date of the printing and/or publishing, and/or the name of the printer and/or publisher of an older monographic publication, transcribed in the form and order as they appear in the colophon. Punctuation, e.g. parenthesis, can be generated for display of this subfield, if required by the cataloguing rules. Not repeatable.

Notes on Field Contents
Field repeatability
The field is repeatable for resources that change over time so that both earliest, current and, if desired, intervening publishing information could be included in the record. Resources that change over time include multipart monographs, continuing resources and integrating resources.

Repeatable 210 fields give subsequent information only on the activity of different publishers and/or places of publication for the given period of time.

All names of places and publishers that appear on the first issue of a resource must be transcribed in the first field 210. In the case of a change affecting only one publisher, all names of places and publishers must be transcribed in the subsequent repeatable field 210 (EX 22).

Dates in the first field 210 give the complete publication dates for a resource: start and end years (as given in the field 100$a/9-16) regardless of the change of publishers and/or place of publication.
Information related to start and end dates of the first publisher should be recorded in the first repeatable 210 with the first indicator value 0 (zero).

See EX 19-23.

Subfield contents:

It is recommended that each record should have a field 210. Places, names and dates should where possible be as on the item. Where place and name of publisher are not known, [S.l.] (sine loco) and [s.n.] (sine nomine) or their equivalents in non-roman scripts are entered in subfields $a$ and $c$ respectively (EX 9). When more than one publisher/distributor is given, each is preceded by its place in separate repeated subfields (EX 5, 8). The rules for the omission or of names of places and publishers depend on the practices of the agency.

Dates:

A date is always in subfield $d$. If the date of publication is not known a copyright date or an approximate date may be given. Such a date may be indicated as a copyright date (EX 7) or date of manufacture. A copyright date may be entered in addition to the date of publication; both are entered in the same subfield $d$. When date of manufacture is entered in addition to the date in subfield $d$, it is entered in subfield $h$ (EX 13). Parentheses are omitted from this subfield, and are generated at output.

For manuscripts, or other non-published items, a date or range of dates (century or portion of century) is permissible.

A spanning date may be entered in any date subfield (EX 10). When an open date is entered (EX 6) it is entered without any following space. If required, such spaces are generated at output.

Parallel data:

Parallel data may be entered in this field, in which case it is entered in a repeated subfield and preceded by an equals sign and space “=” (EX 14).

ISBD information:

ISBD recommend that any full address in $b$ or $f$ be entered in brackets if it is supplied by the cataloguer or in parentheses if it is taken from the item. Since this is not prescribed punctuation, it should be carried if required for a record even when it occurs at a subfield boundary (EX 4). When a distributor is named, a term such as Distributor or its equivalent may be entered in brackets (EX 5, 12). Although these brackets are prescribed punctuation in the ISBD, they are not dropped at subfield boundaries in the UNIMARC record.

For further information on the data content of this field refer to the relevant ISBD. The correspondence between this field and ISBD specification is illustrated below.

Related Fields

100  GENERAL PROCESSING DATA, Dates of publication (character positions 9-16)
    Dates of publication are entered in field 100 as well as in 210 $d. Both should be entered: in field 100
    the real date is entered and in field 210 subfield $d the date present on the resource.

102  COUNTRY OF PUBLICATION OR PRODUCTION
    This field contains a code for the country or countries of publication or production and a code for the
    locality. It is recommended that field 102 be used in addition to field 210.

205  EDITION STATEMENT
    A date of printing for a reprint etc. may be included in an edition or issue statement.

306  NOTES PERTAINING TO PUBLICATION, DISTRIBUTION, ETC.
    This field contains a note about publication, distribution, etc. For information on changes of publication
    distribution, etc., it is optional to use repeatable field 210 as well as field 306.

345  ACQUISITION INFORMATION NOTE
    This field contains the full mailing address of a publisher, distributor etc.

620  PLACE AND DATE OF PUBLICATION, PERFORMANCE, ETC.
    PLACE AND DATE ACCESS
    If it is desired to provide an access point for the place of publication, production etc., the place and date
    of performance, etc., are entered in this field

7--  RESPONSIBILITY BLOCK
    If it is desired to provide an access point for a publisher or manufacturer, the name of the person or body
    is entered in a 7-- field.

Examples

EX 1:  210 ##$a[Cambridge, Mass.]$cHarvard Univ.$d1981

The place of publication is not in the chief source of information. The agency abbreviates common
words in the publisher’s name

EX 2:  210 ##$aBrampton [Cumbria]$cL.Y.T.C.$d[1978 or 1979]

The place in the imprint is not well-known and a county is added. The date is not certain.

EX 3:  210 ##$aNottigham [i.e. Nottingham]$c[s.n.]$d1966$gSherwood Printers

The place name is incorrectly or archaically spelled and no publisher is named.

EX 4:  210 ##$aLondon$sc(52, St. George’s Avenue, N7)$cSt George’s Church$d[1975]

The address of the publisher has been included by the agency preparing the record. The date is taken
from elsewhere than the chief source of information and is enclosed in brackets.

The statement of the function of the distributor is added.

EX 6:  210 ##$aLondon$scMacmillan for the Linnean Society$d1964-@

The date is an open date. In this example the end of field marker '@' is included for clarity.

EX 7:  210 ##$aLondon$saBoston$scButterworth$sdcop. 1982

A repeated place of publication is needed for one publisher. The date is a copyright date and indicated as
such.

EX 8:  210 ##$aIpswich$scBoydell P.$saBungay$scWaveney Publications$d1976

The item has more than one publisher.
EX 9: 210 ##$a[S.l.$cs.n.]$sd1974$eManchester$gUnity Press
The item has only the name of the printer. S.l.and s.n. are supplied.

The agency preparing the record enters only the first place of publication. The item was published in separate volumes over a period of time.

EX 11: 210 ##$aBombay$cs.n.$sd1980 printing
The date of printing is given in lieu of a date of publication and indicated as such.

Both name and place of publisher are in more than one language.
