An agency may determine that the data on uniform title is significant for the purpose of creating an independent title access point and this will be reflected in the first indicator; however, in all cases in which the access point uniform title is the primary (main) entry (Indicator 2 = 1) the uniform title it must be considered significant for independent title access.

The first indicator does not refer to the desirability of creating author/uniform title access points using the data in this field. Such access is determined according to the conventions of the record user.

Indicator 2: Primary Entry Indicator
Specifies whether the preferred access point uniform title is primary (main) entry, i.e. there is no author (7--) primary entry and the cataloguing agency has entered the record under a uniform title. Use value 0 for cataloguing codes which do not recognise the concept of primary entry.
0  Title is not used as a heading
   The preferred access point uniform title is not the primary entry, though an added access point may be made for it as specified in Indicator 1 (EX 1, 2).

Notes on Field Contents
The preferred access point uniform title should be entered according to the rules of the inputting agency. The use made of these access points uniform titles varies considerably between one agency and the next even when the same cataloguing rules are used. Those preferred access points uniform titles which are main entry headings, i.e. those used primarily for anonymous classics, are an essential part of the record and must be exchanged, since they may be the only access point. Other preferred access points uniform titles which never appear as a main entry heading are less significant, but it is recommended nonetheless that they be included in the exchange record.

Each cataloguing code has its own preferences for the form of headings, depending usually on tradition and language of cataloguing. Although no international standards exist, the following document published by the IFLA International Office for UBC is a step in that direction.

Some cataloguing codes prescribe uniform headings for treaties, laws, protocols, etc. These should also be placed in UNIMARC in field 500, and be regarded as preferred access points uniform titles. Any places or dates of treaties should be entered in $n Miscellaneous Information (EX 6, 9).

Related Fields

503 UNIFORM CONVENTIONAL HEADINGS
Uniform conventional headings always occur as primary entries for works without authors with primary responsibility under cataloguing rules which specify forms of headings for conferences, exhibitions, festschriften, etc., when these are not regarded as corporate authors.
